

## COMPANY OVERVIEW

PSG Civil is a Queensland-based civil construction contractor delivering quality civil infrastructure solutions for developers, principal contractors, local government and utility providers.

Backed by decades of industry experience, our team delivers practical, reliable civil construction services across earthworks, underground infrastructure, pavements, concrete works and project completion. We are committed to delivering safe, efficient and high-quality outcomes, supported by strong project coordination, quality assurance and compliance throughout every stage of construction.

Whether delivering a discrete subcontract package or supporting larger infrastructure projects, PSG Civil provides responsive service, experienced supervision and a commitment to completing works safely, on programme and to specification.

## CORE CAPABILITIES

- Bulk earthworks and site preparation
- Cut, fill and formation works
- Water, sewer and stormwater infrastructure
- Electrical and communications conduits
- Road and pavement construction
- Kerb and channel
- Concrete structures and hardstand areas
- Footpaths, driveways and shared pathways
- Earth retaining structures
- Landscaping and reinstatement

## INDUSTRY EXPERIENCE

Our team has extensive experience delivering civil infrastructure projects throughout Queensland across residential developments, subdivisions, transport infrastructure, utilities and local government projects. Our experience includes the planning, coordination and delivery of works involving:

- Bulk earthworks and site establishment
- Detailed excavation and service trenching
- Water reticulation networks
- Sewer reticulation networks
- Stormwater drainage systems
- Electrical and communications infrastructure
- Road and pavement construction
- Kerb and channel
- Concrete structures and footpaths
- Landscaping and reinstatement
- Quality assurance, testing and project handover

Our practical understanding of construction sequencing, project coordination and compliance enables us to deliver efficient solutions while maintaining quality, safety and programme objectives.

## MORE CAPABILITIES

- Detailed excavation and trenching
- Underground service coordination
- Pit installation and service crossings
- Imported fill placement
- Compaction and quality control
- Minor civil structures
- Defect rectification
- Practical completion works
- Quality assurance documentation
- Project handover support

## DELIVERY CAPABILITY

PSG Civil specialises in delivering small to medium civil construction packages with a strong focus on quality, safety and reliable project delivery.

Through established industry relationships and trusted subcontractor networks, we have the flexibility to scale resources to meet project requirements while maintaining direct management, quality oversight and clear communication throughout every stage of construction.

Our objective is to become a trusted delivery partner by consistently providing dependable workmanship, proactive communication and successful project outcomes.

## WHY PSG CIVIL

- Experienced civil construction professionals
- Practical understanding of all stages of civil infrastructure delivery
- Strong focus on quality, safety and environmental compliance
- Reliable communication and responsive project management
- Flexible delivery capability for small to medium civil packages
- Commitment to programme, quality and client satisfaction
- Proven understanding of project completion and handover requirements

## QUALITY & COMPLIANCE

Quality, safety and environmental compliance are fundamental to every project undertaken by PSG Civil. Our team understands the importance of delivering infrastructure that not only meets specification during construction, but also satisfies testing, inspection and handover requirements at project completion. With extensive knowledge of civil infrastructure standards, quality assurance processes and construction documentation, we work closely with clients to ensure projects are delivered efficiently, safely and in accordance with contractual requirements.
